SWH:

This is a very readable and persuasive report. I have made some minor language change suggestions and raised a couple of questions.

In addition, you might want to consider stressing the point that the bulk of the Agency's sensitive foreign intelligence information deals with ~~the~~ foreign personalities and obviously should be exempted from the disclosure requirements.

As you are aware, to complete the project you should ~~██████~~ prepare for GLC signature the standard clearance request to OMB and a note on a routing sheet from GLC to the Director distilling the barest essentials and indicating with whom the proposed report has been coordinated.
